

PRODUCT INFORMATION

RUSIC® 24

LPS SAFETY LIGHT UNIT FOR SUPPLY OF 24VDC LIGHTS

Product Description

RUSIC® 24 is your reliable system for monitoring and testing up to 160 emergency and information lights. In accordance with the specifications from VDE 0108 and DIN EN 62034, RUSIC® 24 offers the option of automated or manual triggering of the necessary tests.

Highlights

- **Automatic and manual testing:** RUSIC® 24 performs automatic or manual function tests and capacity tests.
- **Up to 160 luminaires can be connected:** Expand your installation without additional effort.
- **No manual inspection book required:** Thanks to integrated storage of fault messages.
- **Easy integration:** Messages can be forwarded to a central control station via potential-free contacts or a web connection.

Applications

RUSIC® 24 is a versatile monitoring system for emergency and information luminaires that provides excellent service in a wide range of applications. It guarantees maximum reliability in healthcare, office and residential buildings, hotels and retail. Educational institutions and industrial facilities benefit from the automated testing functions that ensure safety. In addition, the system is suitable for transportation and infrastructure projects, as well as public and cultural facilities, to ensure seamless monitoring of lighting everywhere and thus a high level of safety and compliance.
