

PRODUCT INFORMATION

RUSIC® 24

LPS SAFETY LUMINAIRE UNIT FOR 24 V DC SUPPLY

Product description

RUSIC® 24 is a reliable solution for monitoring and testing up to 160 emergency and indicator luminaires. Fully compliant with VDE 0108 and DIN EN 62034, RUSIC® 24 supports both automated and manual execution of all required tests.

Key features

- **automatic and manual testing:** RUSIC® 24 supports automatic or manual function and capacity testing
- **up to 160 luminaires supported:** enabling straightforward system expansion without additional effort
- **no manual logbook required:** fault events are automatically stored in the integrated memory
- **easy integration:** notifications can be forwarded to a central monitoring system via potential-free contacts or a web interface

Applications

RUSIC® 24 is a versatile monitoring system for emergency and safety luminaires, delivering reliable performance across a wide range of applications. It ensures maximum dependability in healthcare facilities, office and residential buildings, hotels, and retail environments.

Educational institutions and industrial facilities benefit from automated testing functions that enhance operational safety. The system is also ideally suited for transport and infrastructure projects as well as public and cultural facilities, ensuring seamless lighting monitoring and consistently high levels of safety and compliance.
